VR-NISSAGE #3

JOHN WENTZ

Our mission with VR-NISSAGE was to take the concept of an art gallery to the next level by reinventing it. The art exhibition of the future will be in true virtual reality, where the visitor can walk around freely and interact with this world via virtual hands. Full immersion virtual reality means the level of freedom you have is high enough that you believe you are in this virtual space and not in your room at home. This inaugural virtual reality art exhibition can be downloaded from the myFINBEC website and experienced at home. We hope you enjoy visiting this virtual reality art exhibition featuring 22 original paintings by artist John Wentz.

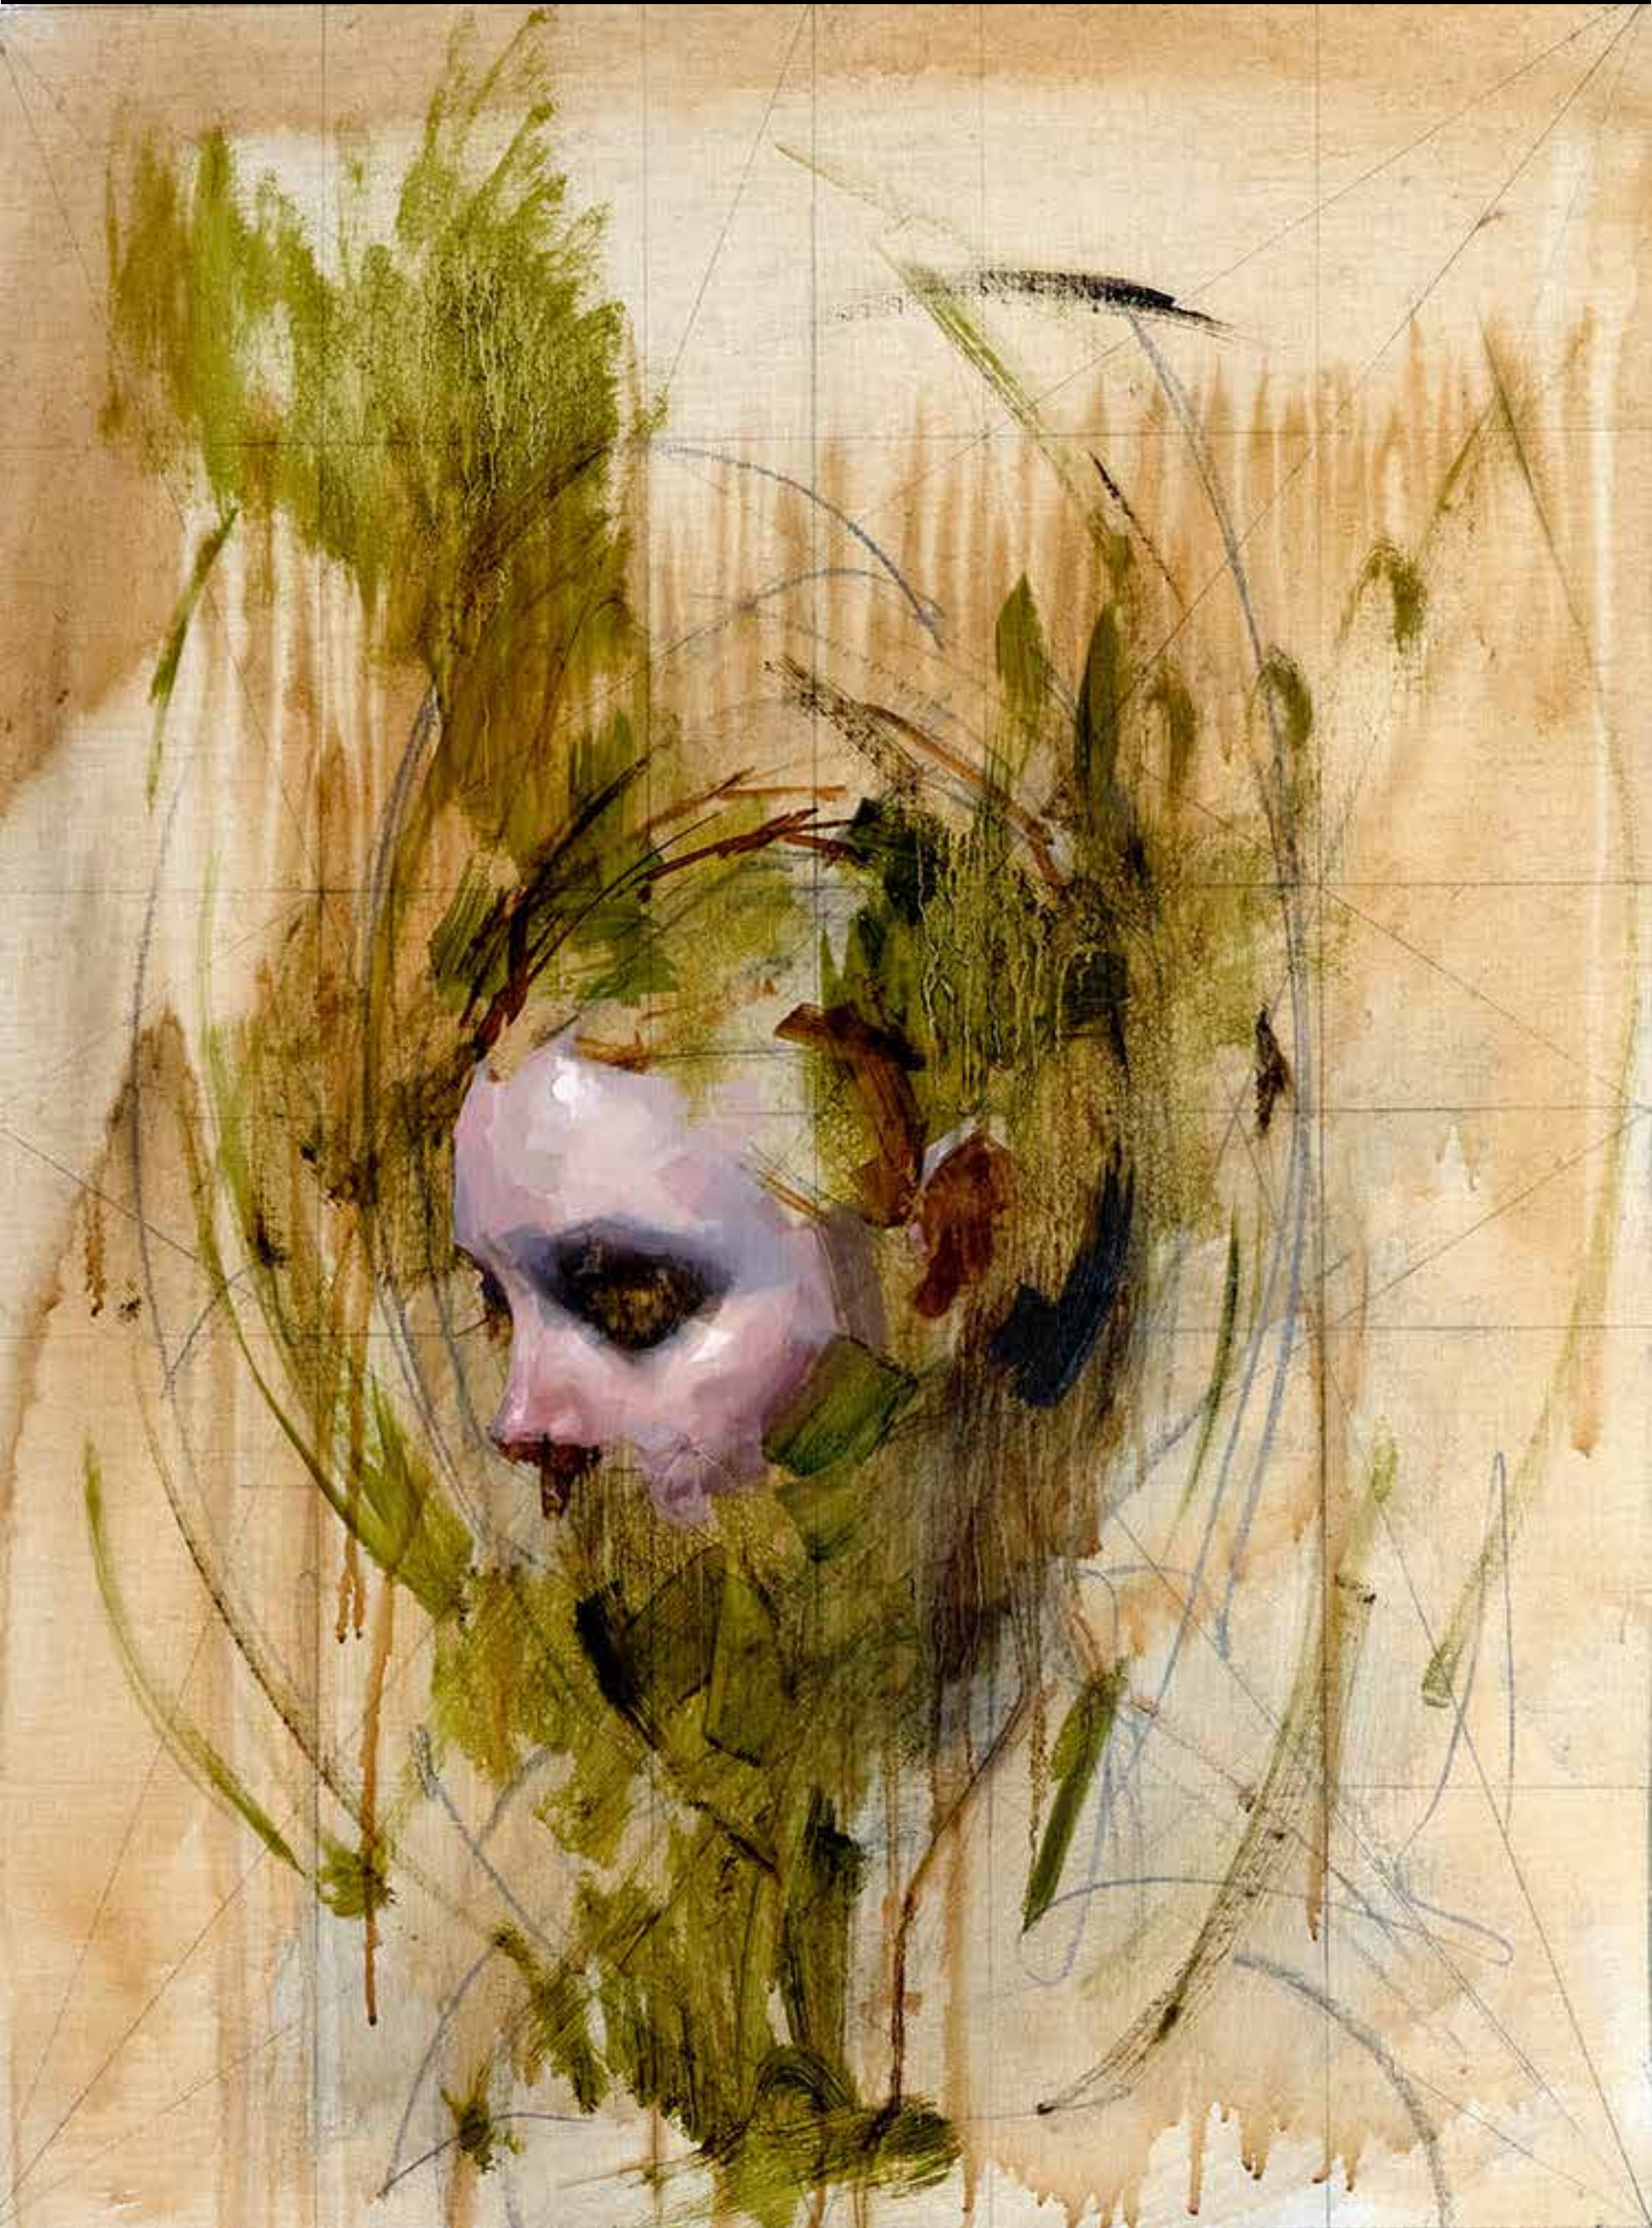

VR-NISSAGE #3

JOHN WENTZ

John Wentz is a contemporary artist whose work is an exploration of process and technique. Working within the classical idiom of the human figure, his goal is to reduce and simplify the image to its core fundamentals: composition, color, and mark-making. Paint application and brush strokes are broad and simplified as a means to connect and convey these ideas to the viewer with an abstract sensibility.

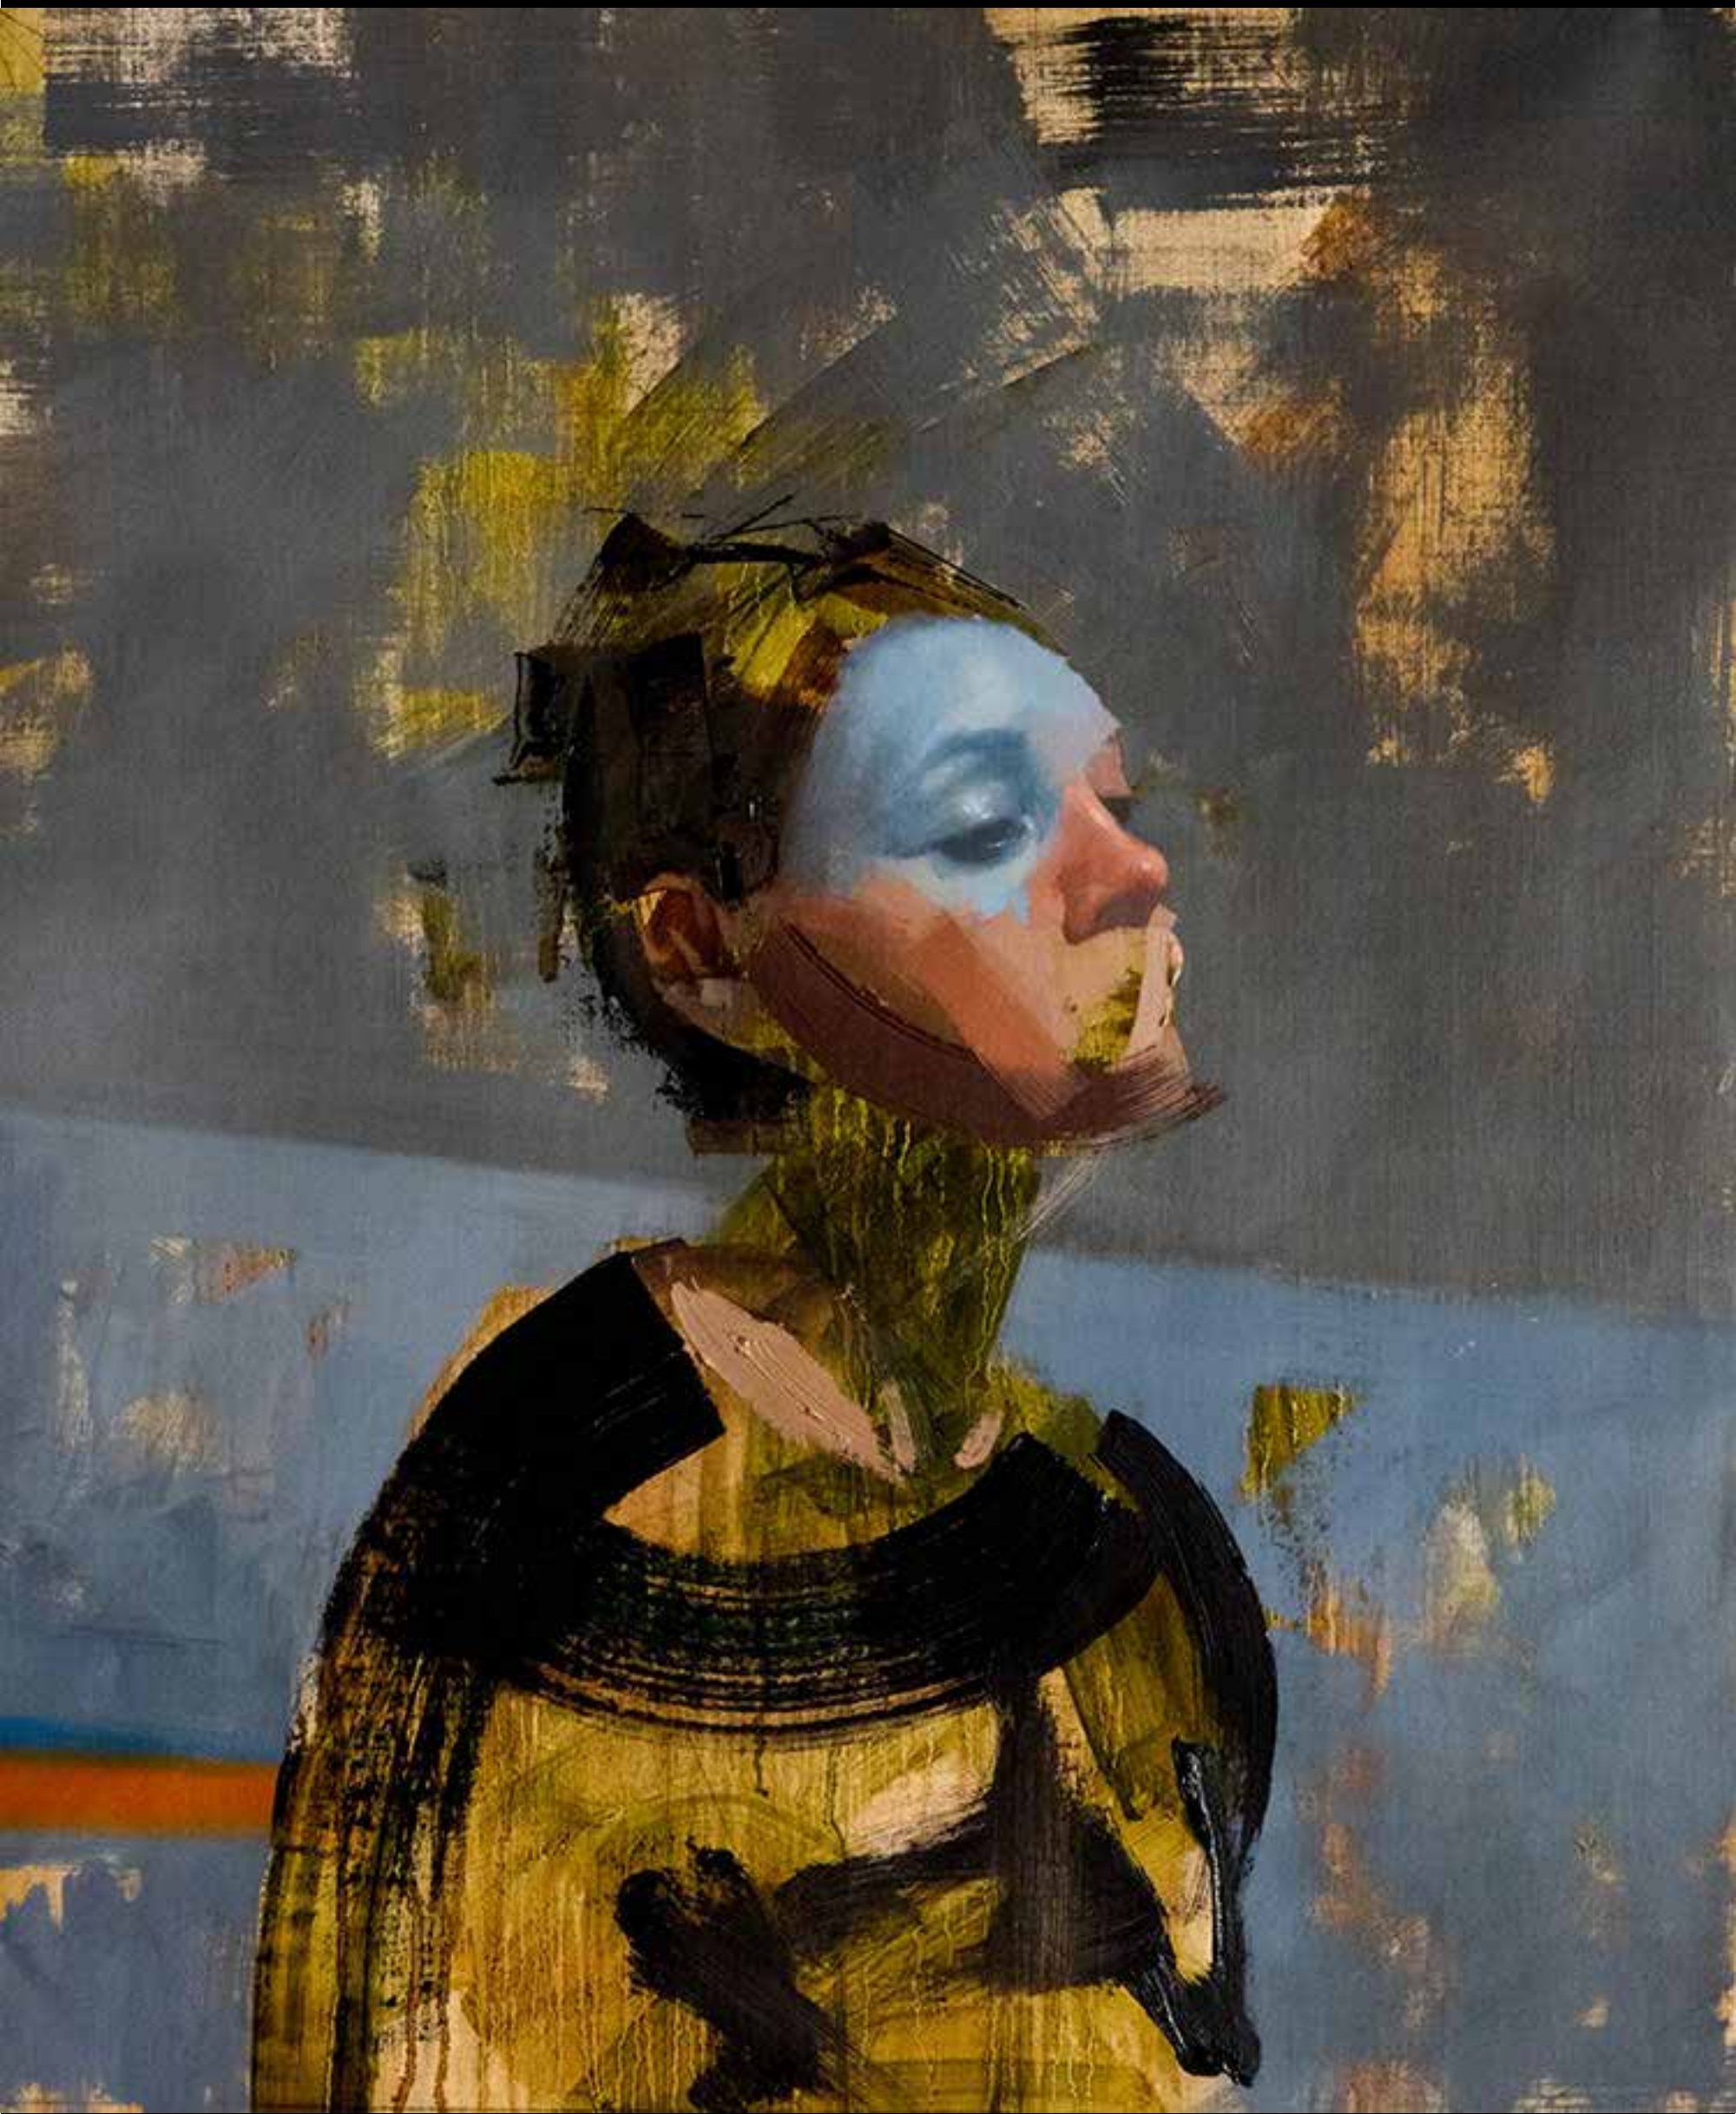

John was born and raised in the San Francisco Bay Area. His interest in art began at the age of 6 when he first discovered Batman and Spiderman comic books. After years of copying comics panel by panel, he worked in the commercial arts as a muralist, billboard creator, and freelance illustrator. After learning to paint by doing airbrushed billboards, he decided to pursue Fine Art and work in oils. Since then, he has had 5 solo exhibitions in San Francisco and numerous group exhibitions both nationally and internationally. His works have appeared in many publications and have won multiple awards.
